

OAKSON, INC.

Innovative Drip Dispersal, Water Re-Use, and Wastewater Products

You're Invited !!!

Environmentally Beneficial and Innovative Technologies:

Perc-Rite Drip Dispersal & Rainwater Capture Systems – A Start to Your Sustainable Future

We invite you to learn about two very innovative products on the market: The Perc-Rite® Drip Dispersal System is fully approved in Massachusetts, New Hampshire, Maine, & Vermont (and 30 other states & Canada) and has quickly become a superior & permanent solution for wastewater disposal. A tried & true system in use 30+ years, it's **the only approved drip system which can be used for septic tank effluent or treated effluent for new construction or repairs.**

The RainKeeper® rainwater capture system is easy, affordable, and a great way to capture and reuse our most precious resource...water. With global water shortages and municipal bans, it's prudent to harvest rainwater. This environmentally beneficial option is available for residential or commercial sites. No fee to attend these sessions; light refreshments will be served.
