

SECTION 9 – SEVEN YEAR ACTION PLAN

Preserving Foxborough's character and enhancing the Town's open space and recreation resources and opportunities requires a grassroots, community-based approach. Strong support and participation by all interested and potentially opposing parties will be the most critical component when pursuing any of this Plan's goals and objectives. By consensus building, most conflict is addressed before it arises *and* the result is usually a better end product that stands the test of time. The Plan's action items advocate for this approach.

The purpose of this section is to establish a year-by-year timetable for specific actions needed to accomplish the goals and objectives listed in Section 8. This section indicates which action steps or recommendations are priorities based on needs and abilities. A priority is assigned for each action step/recommended task associated with a goal. "High" Priority items will likely take place in the first and second year. "Medium" Priority items will likely take place in the third through fifth year. And "Low" Priority items will likely take place in the sixth and seventh year. The table also lists for each task a responsible party; potential collaborating parties; and, where possible, estimated funding or resources. Map 7, an Action Map, provides a geographic representation of action plan sites.

Potential Funding Sources

Potential funding sources for this action plan will need to be researched at the time/times that they are proposed, but could include one or more of the following:

1. Foxborough Conservation Fund
2. Foxborough Recreation Department Revolving Account
